## Abstract of JP 2001072510 (A)

**PROBLEM TO BE SOLVED:** To obtain the subject composition exhibiting synergistically improved effect against the infection of late blight and downy mildew by including a specific substituted benzene derivative, a dithiocarbamate-based compound and the like. **SOLUTION:** This composition contains at least two active ingredients of (A) a substituted benzene derivative represented by formula I [R is a 3-12C alkyl, a 3-12C halogenoalkyl or the like; Ar is a group of formula II (R1 is trifluoromethyl, difluoromethyl or the like; R2 is H, methyl, trifluoromethyl or the like; n is 0-2) or the like], and (B) at least one compound selected from a dithiocarbamate-based compound, an organic chlorine-based compound, an inorganic or organic copper salt, an acylalanine-based compound (preferably metalaxyl), an acrylate-based compound, dimethomorph, cymoxanil and fosetyl-aluminum.
